

A silver car is shown from a front-quarter perspective, moving through a car wash. Large, dense red brushes are visible on the left and right sides of the car, indicating the washing process. The car's surface is wet and covered in white foam. The license plate is partially visible, showing a blue background with a white 'E' and a small European Union flag. A red square is overlaid on the image, containing the word 'ROLLOVERS' in white capital letters.

ROLLOVERS

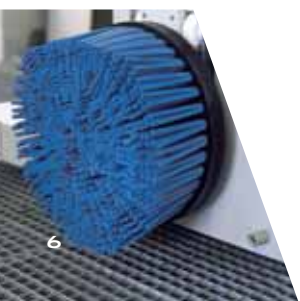

M4.1

The essentials for an automatic clean

If you are looking to speed up the wash process of your business, the M4.1 is what you need. With this Basic Range roll-over, you can stop manual cleaning and go automatic, safe in the knowledge that you have the necessary features to offer a top quality service.

Simple, reliable, economical and very practical, the M4.1 rollover offers: a wash, wax or super wax and drying power of up to 15.6kW.

Opt for the M4.1 and forget manual washing.

RANGE	Vehicle access in meters			Recommended bay			rollover travel m/minute	Dryer Power in kW.	Cars/hour	Model
